

Tool balancer

Tool balancers, load balancers, and spring balancers are an ideal way to balance a constant load.

A simple tool balancer, positioned above your operator's workstation, will carry the weight of your tool so your operator doesn't have to.

Tool Balancers Reduce Injuries and Improve Performance. Not only does a tool balancer reduce the risk of injury, but it also reduces fatigue and increases productivity.

Tool balancer, they make tools nearly weightless, reduce fatigue. Reduce operator fatigue. Improves safety and ergonomics. Reduce tool damage, prevent tools from being accidentally dropped.

OUR CAPABILITIES

- Ultra-high pressure and high current, the highest pressure of gas and liquid up to 80-100MPA. Taking advantage of the National New Energy Policy, the maximum current of the DC charging reel can reach to 500A.
- Super-long. Spring-driven reels can handle hoses or cables up to 50 meters. Motor-driven reels' capacity up to 3000 meters.
- Engineering reciprocation. One of the few domestic manufacturers that can produce reciprocating hose reels and multi-line hydraulic reels.
- Smart reels with intelligent functions. Limit, feedback, measurement, remote control, APP control, adaptive control and other functions are used in our reels.

Superreel® - Industrial Reel

- Hose and cable combined reels. One reel can manage/ transmit media including acousto-optic signals, various gas-liquid media, etc, at the same time.
